# Working on Policy Options

- Stringent timelines with the winter season approaching

- Draft policy options will be presented in the workshop on the 4th October.

- Policy options could be based on:
  - Regulations (MEPS and/or labelling) on:
    - Insulation/cladding requirements for prevention of heat loss
    - Heating efficiency
    - Energy use per unit delivered service.
    - …

# Workshop on the 4th of October

- Senior level participation solicited
- Your input is vital and you will give input on:
  - What timelines are reasonable
  - What technology options are reasonable
  - Under the given constraints / gas shortage what is the fastest yet workable route we might take
  - Protecting the local industry and discouraging dumping of low quality foreign products.
  - Advising us along the way helps you stay part of the process and fully aware of the policy options that may be implemented in the future !
